## SUMMARY

Frontend & Full Stack Developer with **1+ years of experience** building scalable web applications, SaaS platforms, and AI-powered products. Skilled in React.js, Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Python, and REST API integration.

Experienced in developing responsive user interfaces, authentication systems, role-based SaaS platforms, dashboards, and frontend-backend integrations. Strong understanding of performance optimization, database connectivity, and scalable product development in startup and freelance environments.

**Winner of the Google Chrome AI Hackathon 2025** for delivering a production-ready AI-powered web solution.

## WORK EXPERIENCE

### Frontend Engineer , A S CODELABS

Aug 2024 – Mar 2026

- Engineered scalable and responsive web applications using React.js, Next.js, TypeScript, Tailwind CSS, and JavaScript.
- Crafted reusable and maintainable UI components with mobile-first and cross-browser compatible architecture.
- Incorporated REST APIs, authentication systems, forms, and backend services for seamless frontend-backend connectivity.
- Managed Supabase and PostgreSQL integrations for authentication, database operations, and real-time workflows.
- Delivered dashboards, SaaS portals, and role-based access management systems for business applications.
- Transformed Figma designs into pixel-perfect, production-ready interfaces with enhanced user experience.
- Streamlined application performance, accessibility, responsiveness, and SEO across multiple projects.
- Partnered with designers, developers, and stakeholders in fast-paced startup environments.

## FREELANCE EXPERIENCE

### Freelance Web Developer

Mar 2026 – Present

- Designed and launched responsive business websites for freelance clients using React.js, Next.js, and Tailwind CSS.
- Connected forms, APIs, and backend services to support dynamic business workflows and user interactions.
- Architected a SaaS-based role management portal with authentication and Role-Based Access Control (RBAC).
- Executed admin dashboard functionalities to manage users, permissions, and module-level access control.
- Structured scalable multi-module platform architecture supporting multiple POC applications within a centralized portal.
- Upgraded website performance, responsive layouts, and SEO for improved accessibility and user engagement.

## PROJECTS

### SaaS Role-Based POC Portal

- Architected a scalable SaaS platform with centralized authentication and Role-Based Access Control (RBAC).
- Configured admin management workflows to control user permissions and module-level access across multiple POC applications.
- Merged frontend and backend workflows using REST APIs, Supabase, and PostgreSQL.
- Crafted responsive dashboards and dynamic user interfaces for seamless multi-module navigation.
- Enforced secure authentication, protected routes, and scalable portal architecture.

**Web Design & Development | [Click here to visit](#)**

- Produced responsive, SEO-optimized, and high-performance websites using React.js, Next.js, and Tailwind CSS.
- Structured reusable UI components with modern frontend architecture and responsive layouts.
- Connected forms, APIs, backend services, and database systems for dynamic website functionality.
- Enhanced cross-browser compatibility, performance optimization, and mobile-first user experiences.

**Helix AI – Chrome Extension & Web Platform (2025 Hackathon Winner) | [Click here to visit](#)**

- Created responsive landing pages and frontend web platform for an AI-powered Chrome extension product.
- Applied reusable UI components, improved application performance, and refined user workflows.
- Contributed to delivering a production-ready AI solution focused on scalability and user experience.

**BillSheet AI (Financial Web Application) – Frontend Development | [Click here to visit](#)**

- Engineered scalable frontend architecture for a financial SaaS web application with responsive and modern UI.
- Converted design mockups into pixel-perfect production-ready interfaces with intuitive workflows.
- Blended frontend modules with APIs and backend services to strengthen functionality and user interaction.

**HabitTrace – Habit Tracking Application | [Click here to visit](#)**

- Built a scalable habit tracking application with reminders, daily activity logs, and customizable tracking features.
- Designed interactive dashboards and analytics views to visualize user progress, streaks, and consistency.
- Implemented responsive UI components and structured frontend workflows for enhanced usability.

---

**SKILLS**

**Frontend Development :** HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Responsive Web Design.

**Backend & APIs:** Python, REST APIs, API Integration, Authentication, CRUD Operations.

**Database & Cloud:** Supabase, PostgreSQL, MySQL, Oracle SQL.

**Tools & Platforms:** Git, GitHub, Vercel, Render, VS Code, Cursor, Chrome DevTools.

**UI/UX:** Figma, Design-to-Code Conversion, Pixel-Perfect UI, Accessibility (WCAG).

**AI & Automation:** ChatGPT, Claude, Gemini, V0, Bolt, Lovable, Prompt Engineering, n8n.

**Other:** Dashboard Development, SaaS Platforms, Role-Based Access Control (RBAC), Frontend-Backend Integration.

---

**EDUCATION**

**Anna University (2020–2024)**

- Bachelor of Technology in Information Technology.

**St. Thomas Matriculation Higher Secondary School**

- HSC (2019 - 2020).
- SSLC (2017 - 2018).
