## SUMMARY

Frontend Engineer with 1+ years of experience building modern web applications, SaaS platforms, and business dashboards using React.js, Next.js, TypeScript, and FastAPI.

Specialized in frontend architecture, API integration, authentication systems, and responsive UI development. Experienced in delivering end-to-end solutions from design implementation to deployment using Supabase, PostgreSQL, Vercel, and Render.

## WORK EXPERIENCE

### Web Developer Intern | Analytics Avenue

Apr 2026 – Jul 2026

- Developed responsive business websites, landing pages, and SaaS Proof-of-Concept (POC) portals using React.js, Next.js, TypeScript, Tailwind CSS, and JavaScript.
- Built scalable SaaS platforms, dashboards, and admin portals.
- Implemented authentication, RBAC, REST API integrations, and backend connectivity using FastAPI, Supabase, and PostgreSQL.
- Converted Figma designs into pixel-perfect, responsive, production-ready interfaces.
- Optimized application performance, accessibility, responsiveness, and SEO.
- Collaborated with cross-functional teams to deliver production-ready web applications.

### Frontend Engineer | A S CODELABS

Aug 2024 – Mar 2026

- Engineered scalable and responsive web applications using React.js, Next.js, TypeScript, Tailwind CSS, and JavaScript.
- Crafted reusable and maintainable UI components with mobile-first and cross-browser compatible architecture.
- Incorporated REST APIs, authentication systems, forms, and backend services for seamless frontend-backend connectivity.
- Managed Supabase and PostgreSQL integrations for authentication, database operations, and real-time workflows.
- Delivered dashboards, SaaS portals, and role-based access management systems for business applications.
- Transformed Figma designs into pixel-perfect, production-ready interfaces with enhanced user experience.
- Streamlined application performance, accessibility, responsiveness, and SEO across multiple projects.
- Worked with cross-functional teams across 10+ projects, ensuring timely feature delivery and maintaining production-ready applications.

## PROJECTS

### HabitFlow – Daily Habit & Reflection Platform | [Click here to Visit](#)

**Tech Stack:** React.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, shadcn/ui, Vercel

- Built a SaaS-based habit tracking and daily reflection platform featuring authentication, dashboards, recurring task planning, and configurable reflection workflows.
- Enhanced dynamic CRUD modules for daily questions, task management, streak tracking, calendar history, and progress analytics with Supabase PostgreSQL and RLS.
- Designed responsive dashboards with interactive charts, completion metrics, and reusable UI components using React, Tailwind CSS, and Framer Motion.
- Executed scalable state management, secure user-specific data access, and deployed the application on Vercel using a modern component-based architecture.

### Web Design & Development | [Click here to Visit](#)

**Tech Stack:** React.js, Next.js, Tailwind CSS, REST APIs, Supabase, PostgreSQL

- Produced high-performance business websites with SEO optimization.
- Integrated forms, APIs, and backend services for dynamic functionality.
- Implemented reusable UI components and mobile-first design principles.

Helix AI – Chrome Extension & Web Platform | [Click here to Visit](#)

**Tech Stack:** React.js, JavaScript, HTML5, CSS3, Chrome Extension APIs, Figma.

- Designed and developed the complete marketing website and frontend experience.
- Built reusable UI components and responsive layouts for cross-device compatibility.
- Contributed to a production-ready AI solution recognized at Google Chrome AI Hackathon 2025.
- Earned Honorable Mention for innovation and technical execution.

Attendance Management Dashboard

**Tech Stack:** React.js, FastAPI, Supabase, PostgreSQL, JWT Authentication, Cron Jobs, Resend Email API, Vercel, Render

- Built a full-stack attendance management platform featuring CEO and Employee dashboards, attendance tracking, reporting, and automated email workflows.
- Executed RBAC, attendance tracking, analytics, and reporting modules.
- Automated attendance reports and alert notifications using Cron Jobs and email workflows, eliminating manual report generation.
- Deployed production applications using Vercel (Frontend) and Render (Backend).

SaaS Role – Based POC Portal

**Tech Stack:** React.js, TypeScript, FastAPI, Supabase, PostgreSQL, Tailwind CSS.

- Built a centralized SaaS platform hosting multiple Proof-of-Concept applications.
- Applied authentication, RBAC, and module-level access management.
- Improved responsive dashboards and administrative controls.
- Enabled rapid onboarding of new business solutions through reusable architecture.

---

SKILLS

**Frontend Development :** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Component-Based Architecture.

**Backend & APIs:** Python, FastAPI, REST APIs, JWT Authentication, CRUD Operations.

**Database:** Supabase, PostgreSQL, MySQL, Oracle SQL.

**Cloud & Deployment:** Vercel, Render, GitHub, Git.

**UI/UX:** Figma, Design Systems, Accessibility (WCAG), Mobile-First Design, Design-to-Code.

**AI & Automation:** ChatGPT, Claude, Gemini, Prompt Engineering, n8n, Workflow Automation.

**Tools:** VS Code, Cursor, Antigravity, Chrome DevTools.

---

EDUCATION

**Bachelor of Technology – Information Technology**

Anna University | 2020 – 2024

---

ACHIEVEMENTS

**Google Chrome AI Hackathon 2025**

- Received Honorable Mention for developing Helix AI, an AI-powered Chrome Extension and Web Platform.
- Successfully delivered a production-ready solution demonstrating innovation, usability, and technical execution.
